CET (with breaks)

OP System™ is an **innovative orthodontic protocol** that combines orthodontic therapy with clear aligners, correction of lingual function and muscular balance of the stomatognathic system.

The Nuvola Pro™ aligners are specially designed to work together with the forces generated by the exercises that the patient does by using the **Freedom™** device. This allows to treat cases made complex by functional alterations, thus decreasing the use of traditional orthodontic aids.

The protocol offers more predictable alignment and effective neuromuscular rebalancing.

With Freedom™ you can work both at the dental level and at the level of deeper structures such as cranial scheme, bone bases and occlusal plane.

Would you like to solve this case in a simple, fast and predictable way?
Come find out how!

BEFORE

AFTER
(11 months)

Program

- / Functional rebalancing as a guiding concept in orthodontic correction: swallowing, breathing, chewing
- / The Nuvola OP System™ protocol
- / The Nuvola Pro™ transparent aligners: its original features
- / The new Freedom™ device: its design, purpose, and integration in the technique with the Nuvola PRO™ aligners, functional characteristics
- / The Freedom Deep™ device and protocols
- / Lingual and cranial function: how a correct balance of the bone bases can be useful for orthodontics
- / The biomechanical and morpho-functional basis: palate and malocclusion types according to the OP System™
- / How to document a OP System™ case with Freedom
- / How to set up a OP System™: indications and integrated functional solutions
- / Clinical cases
- / Questions and conclusions

Dr. Alessandro CARRAFIELLO

/ Degree in Medicine and Clinical Surgery UNIVERSITY OF MODENA
/ Specialisation in Odontostomatology UNIVERSITY OF MODENA
/ Master's Degree in Clinical Posturology UNIVERSITY OF PISA
/ Advanced training in Orthodontics with aligners UNIVERSITY OF VARESE
Director of the OP postural laboratory in Reggio Emilia.
The first in Italy to experiment and publish how to combine functional devices with orthodontic techniques such as aligners and mini-tubes.

Price

€ **140.00** (VAT EXCL.)

Voucher

The course price includes € **100.00** voucher (VAT excluded) valid for 3 months
